CLEANTEX 4th PROJECT MEETING

Last April the Cleantex consortium met, physically to follow up the current advance of the project.

The event was held in Turin, Italy, and was hosted by the partner **ENVIPARK**. Furthermore, this partner started with the presentation of the IO1, exposing that the **virtual course is almost done** and that the only thing left to do is to upload the videos on the website.

Then, **ENSAIT** detailed how the bootcamp (IO2) structure and methodology, that will be implemented in the summer school in Ljubljana next July, would be.

After that, **LEITAT** presented the first draft for the **IO3, the e-book** that will compile practical cases on how **to apply life cycle assessment** and eco-design **in the advanced textile manufacturing industry**, and it was agreed with all partners.

Later on, the **UNIVERSITY of LJUBLJANA**, gave some **information about the summer course** planning and practical indications for the rest of the partners involved in the training.

Also, **AEI TÈXTILS** and **CRE.THI.DEV.** informed the rest of the partnership about the current status of the dissemination and impact of the Project as well as a review of its quality indicators review.

Finally, a general discussion of the project and diverse specific topics took place.

And once the meeting was finished, the partners had the chance to visit **ENVIPARK** facilities.

CURRENT STATUTS OF THE PROJECT

The **video tutorials for virtual training (IO1)** have already recorded according to the structure and contents designed from the results obtained from the form targeted on the beginning of the project on students, managers and professionals from the textile sector.

The **IO2** bootcamp is already defined and will facilitate students to **get in touch with real textile needs related with sustainability**, debates, and dynamic learning through real case challenges on sustainability and circularity.

The **IO3**, the E-book, that will compile good practices of eco-design applied to textiles, is already being created. Templates and indications to the partners have been given and in the following months will be created, reviewed and finished.

LAST NEWS

Check the Cleantex Virtual Platform, on its website!

The **Cleantex website** is already hosting the virtual learning platform, with all accessible and open contents about sustainability, circularity, alternative materials and much more about textile sector. Check it out [here!](#)

Relevant dissemination activities

KTU during the Conference

During last months, **KTU's** activities resulted relevant for the Erasmus+ channels, as their activities to disseminate the Project were chosen for a press release in its [website](#).

Particularly, the KTU participation in the International Conference *Sustainable Circular Economy - The Future of Industry* which was organized in Vilnius.

Next project meeting

Next Transnational Project Meeting will be in September 2022, in Ljubljana, Slovenia.
